宽照面 护眼台灯开创者

状元郎在2019年首次提出“宽照面”护眼台灯概念，相比传统台灯的设计，传统台灯常常使得光线聚焦在一个局部区域，导致该区域的光线过强，与周围环境形成明显的对比。这种局部光线过强不仅容易造成眼睛的疲劳和不适，还可能引发眩光问题，影响视觉舒适度和效率，这个往往也是导致视力近视的最主要原因。

状元郎的“宽照面”台灯是通过优化光学结构，使得光线能够在更广泛的范围内均匀分布，避免了传统台灯局部光线过强的现象。这种设计不仅有效减轻了眼睛因局部光线过强而产生的疲劳感，还提升整体视觉舒适度，为用户创造更加宜人的阅读和工作环境。

状元郎一直在不断努力满足用户对于照明品质的苛刻要求，在色温智能调节功能的基础上，我们更追求细致入微的光线品质，以确保用户能够享受到真正的护眼照明体验。每一盏护眼台灯都是经过精心挑选的材料和工艺的结晶，旨在为用户创造出高品质、舒适、温馨的照明环境。

Zhuangyuanlang first proposed the concept of "wide illumination area" eye protection table lamp in 2019. Compared with the design of traditional table lamps, traditional table lamps often focus the light on a local area, causing the light in that area to be too strong, forming a clear contrast with the surrounding environment. This excessive local light not only easily causes eye fatigue and discomfort, but may also cause glare problems, affecting visual comfort and efficiency. This is often the main reason for myopia.

Zhuangyuanlang's "wide illumination area" desk lamp optimizes the optical structure so that light can be evenly distributed over a wider range, avoiding the phenomenon of excessive local light in traditional desk lamps. This design not only effectively reduces eye fatigue caused by excessive local light, but also improves overall visual comfort, creating a more pleasant reading and working environment for users.

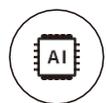

Zhuangyuanlang has been constantly striving to meet users' demanding requirements for lighting quality. On the basis of the intelligent color temperature adjustment function, we are pursuing meticulous light quality to ensure that you can enjoy a true eye-protecting lighting experience. Each eye protection table lamp is the result of carefully selected materials and craftsmanship, aiming to create a high-quality, comfortable and warm lighting environment for users.
